

E-Scrap— A Growing Toxic Problem

Solution: Domestic Recycling

**UNITED
RECYCLING
INDUSTRIES**

The problem...

- Electronic scrap is the most rapidly growing recycling problem in the world.
- It is not only a crisis of quantity, but of toxic content—such as lead, beryllium, mercury, cadmium and brominated flame retardants.

Exporting E-scrap is not a solution

- Men, women and children around the world are being exposed to the pollution caused by open burning, acid baths and toxic dumping.

Secure Data found on discarded computers

- Avoid the risk of leaving secure information on discarded computers. Confidential files left on hard drives can be financially and legally devastating.

The solution...

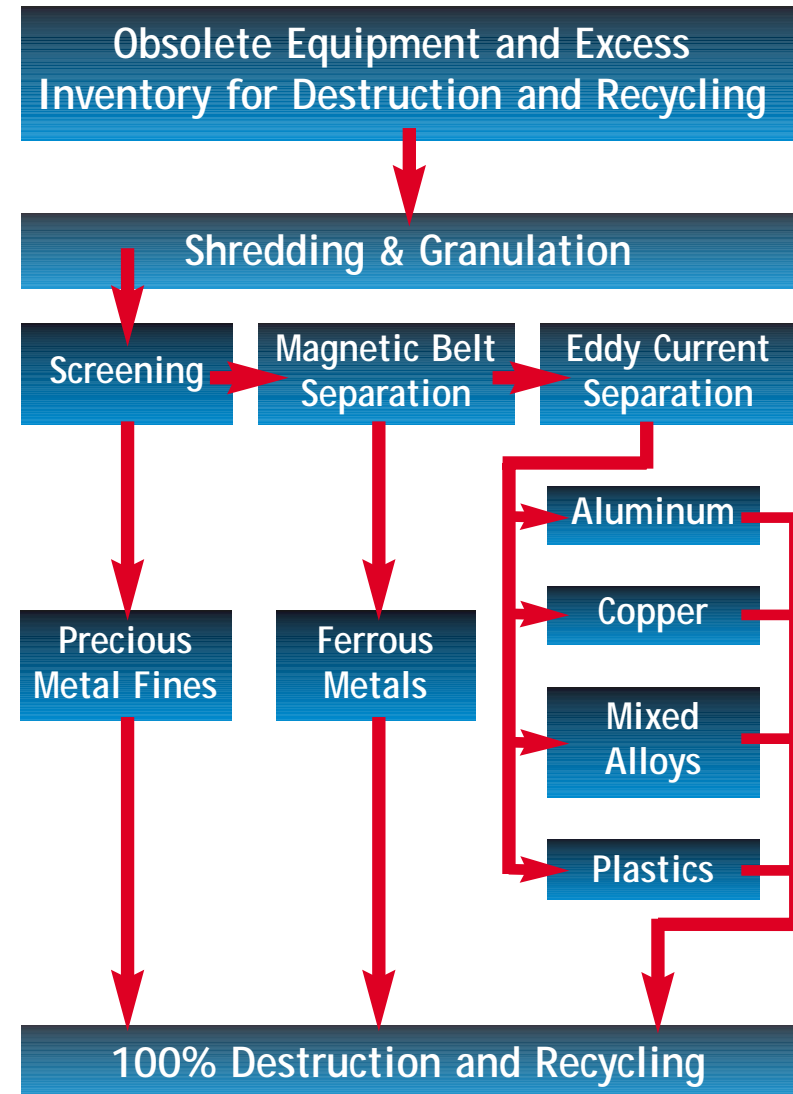

United Recycling Industries' High Capacity Shredder

The Electronics Recycling Solution

United Recycling Industries' state-of-the-art shredding and separation system is designed to meet the growing recycling demands of electronics, telecommunications and medical equipment manufacturers as well as the corporate, industrial and military user.

Shredding, Separation, and Recycling Process

UNITED
RECYCLING
INDUSTRIES

DOMESTIC RECYCLING

**Obsolete Equipment
and Excess Inventory
for Destruction
and Recycling**

Shredding

Separation

100% Recycling

Our system features:

- Custom processing for maximum value recovery
- ISO 9001, ISO 14001 and IAER Certified
- Guaranteed destruction
- Complete shredding & separation
- 6000 pound per hour capacity
- Separation and recovery of:

- | | |
|-------------------|-----------|
| ✓ Precious Metals | ✓ Copper |
| ✓ Aluminum | ✓ Steel |
| ✓ Mixed Alloys | ✓ Plastic |

Don't be left with limited options for your recovery needs as pressures for electronics recycling continue to mount. Contact United Recycling Industries, Inc., to discuss your requirements today.
